Profile

Full Stack Developer with over 3 years of experience delivering system integration and automation solutions for Samsung SDS, Charles & Keith, and Singapore Ministry of Education. Specialized in database development (MS SQL), API integration, and robotics platform connectivity. Quick learner who adapts rapidly to new codebases with consistent track record of successful project deliveries.

Skills

- C#, Java, JavaScript, Kotlin, SQL
- ASP.NET (C#)
- Microsoft SQL Server
- Android Studio, SSMS (SQL Server Management Studio), Docker, Firebase
- UI/UX Knowledge, Warehouse Automation, Robotics Integration
- RESTful APIs, Crystal Reports

Experience

Full Stack Developer, Infolog Pte Ltd 10/2022 – Present

Full-stack development specializing in warehouse automation, robotics integration, and enterprise software solutions for global brands and government agencies.

Samsung SDS Asia Pacific (3D Sorting Automation) 2025

- Engineered and implemented the complete backend logic for 3D Sorting and complex B2B/B2C packing workflows, processing up to **890 orders daily** with peak rates of **210 orders/hour**.
- Developed end-to-end integration between **Samsung Cello logistics platform** and **Libiao Robotics System**, enabling automated 3D sorting operations.
- Developed real-time dashboards for daily/weekly packing and sorting operations, providing management with complete operational visibility for proactive issue resolution.
- Led UAT, Go-Live deployment, and created technical documentation for seamless project handover.
- **Tech Stack:** Angular, ASP.NET (C#), MS SQL Server, ZPL.

Makino Inc (Warehouse Automation) 2025

- Developed complete forklift automation system integration, enabling autonomous warehouse operations.
- Developed customizations for receiving, full/partial pallet transfer, and picking modules with automated Zebra label printing workflow.
- Designed operational dashboards and Crystal Reports providing real-time warehouse performance analytics.
- Implemented RESTful APIs for end-to-end order processing from creation to delivery status

- **Tech Stack:** Angular, ASP.NET (C#), MS SQL Server, Crystal Reports, ZPL.

Storefriendly Self Storage (Robotics Integration)

2024

- Developed complete end-to-end robotic storage management system from scratch, managing **200+ automated storage shelves** across **4 customer terminals**.
- Integrated Hikrobot automation system, enabling concurrent retrieval and return workflows across all terminals.
- Built task management dashboard to monitor and manage robot retrieval requests, queue management, and shelf assignments in real-time.
- Implemented automated door control Windows service, synchronizing door operations with robot arrival/departure for seamless customer access.
- **Tech Stack:** Angular, ASP.NET (C#), MS SQL Server.

Singapore Ministry of Education (Asset Management App)

2024

- Developed complete Android application for government asset management, implementing **all core modules** (Home, Asset List, Discrepancy, Ongoing, Overdue, Upcoming).
- Built **end-to-end photo documentation feature** from camera permission handling through image capture, Base64 encoding, and API upload for asset verification.
- Delivered mobile solution enabling field asset tracking and management for Ministry of Education facilities.
- **Tech Stack:** Java, Android Studio, SQLite.

Soon Aik Global (Warehouse Automation)

2024

- Developed carton-level warehouse automation modules including **CTU Transfer, CTU Cycle Count, Bin Out, Putaway, Call-Out Shelf, and RMS Shelf Status** with Hikrobot integration.
- Integrated Hikrobot system for autonomous carton operations across multiple parallel workstations.
- Built operational reporting module using Crystal Reports for packing lists and warehouse inventory management.
- **Tech Stack:** ASP.NET (C#), MS SQL Server, Crystal Reports.

Charles & Keith Pte. Ltd (Warehouse Automation)

2023

- Developed customizations for warehouse management modules including ASN receiving and inventory enquiry workflows.
- Built automation workflows with Hikrobot integration for transfer operations and shelf call-out functionality.
- Developed backend automation services for shipment confirmation and pick location synchronization, processing **hundreds of orders daily**.
- **Tech Stack:** ASP.NET (C#), MS SQL Server.

Hai Sia Seafood Pte Ltd (POS Mobile Application)

2023

- Developed Android POS application for seafood retail operations, implementing shift management, sales processing, checkout, receipt printing, transfers, receiving, and settings modules.
- Integrated Zebra Printer SDK for receipt printing directly from Android devices.
- **Tech Stack:** Java, Android Studio, SQLite, Zebra Printer SDK.

Internship, Irrahub Co. Ltd

07/2020 – 08/2020

Developed election information web platform enabling voters to search candidate profiles, voter lists, and election packages using React JS and Node JS. Completed full-stack project within 2-month internship period.

Awards

1st Prize - Myanmar National Cloud & AI Contest (2019)

09/08/2019

Developed Paddy Pest Detection mobile application using image classification and computer vision. The app enables farmers to identify pest types and diseases by scanning rice plants with smartphone cameras, providing real-time agricultural diagnostics. Led team project that won first prize in national AI competition.

Education

University of Computer Studies (Taungoo)

12/2015 – 2020

Computer Science (5-Year Program) Attended through final year; degree not completed due to circumstances related to Myanmar political crisis

Taungoo, Myanmar
