PROFILE

Backend .NET developer with 4+ years of experience building C# / ASP.NET systems, MS SQL Server database logic, REST API integrations and automation services for warehouse, robotics and logistics platforms. Integrates WMS software with PLCs, robots, forklifts and Zebra/ZPL printers, and supports UAT, go-live and handover, for clients including Samsung SDS, Schneider Electric, Charles & Keith and Singapore MOE.

Up to 890 orders/day, 210/hour (Samsung SDS 3D sorting) · **200+ robotic shelves** across 4 customer terminals (Storefriendly) · **8 client projects** across logistics, retail, manufacturing and government

SKILLS

Backend & data	C#, ASP.NET, MS SQL Server, T-SQL, REST APIs, Windows Services, Crystal Reports
Hardware & integration	Modbus TCP, Hikrobot, Libiao Robotics, HuarayTech MVSDK, Zebra / ZPL, API integration
Frontend & mobile	Angular, JavaScript, Java (Android), Kotlin, SQLite
Tools & concepts	SSMS, Git, Docker, Firebase, Microservices fundamentals

PROFESSIONAL EXPERIENCE

Full Stack / Backend .NET Developer — Oct 2022 – Present
Infolog Pte Ltd — Remote · Asia-Pacific projects

Backend-focused warehouse automation, robotics integration, WMS customization and enterprise logistics systems for global clients and government agencies.

Schneider Electric · Warehouse automation — 2025 – 2026

- Real-time C# service talks to PLCs over Modbus TCP, captures carton weight and barcode, and decides the sorting lane.
- Integrated HuarayTech MVSDK image capture with conveyor routing through asynchronous, database-driven triggers.
- REST APIs and SQL Server validation logic keep order and packaging data in sync.
- Outbound dashboards for exception handling, shipment tracing and reject-lane resolution.

Tech: C#, ASP.NET, MS SQL Server, REST APIs, Modbus TCP, HuarayTech MVSDK

Samsung SDS Asia Pacific · 3D sorting automation — 2025 – 2026

- Backend logic for 3D sorting and B2B / B2C packing workflows, supporting up to 890 orders a day and 210 an hour.
- Integrated the Samsung Cello logistics platform with the Libiao Robotics system for automated sorting.
- Real-time dashboards for daily and weekly packing and sorting visibility.
- Supported UAT, go-live deployment, technical documentation and project handover.

Tech: C#, ASP.NET, MS SQL Server, REST APIs, Libiao Robotics, ZPL

Makino Inc · Warehouse automation — 2024 – 2025

- Forklift automation integration for receiving, pallet transfer, picking and Zebra label printing.
- REST APIs for order processing, from creation through delivery status updates.
- SQL Server workflows, Crystal Reports and dashboards for warehouse performance monitoring.

Tech: C#, ASP.NET, MS SQL Server, REST APIs, Crystal Reports, Zebra/ZPL

Storefriendly Self Storage · Robotic storage system — 2024 – 2025

- Robotic storage management system for 200+ automated shelves across 4 customer terminals.
- Hikrobot workflows for concurrent shelf retrieval and return, task-queue management and shelf assignment.
- Windows service for automated door control, synchronized with robot arrival and departure events.

Tech: C#, ASP.NET, MS SQL Server, Hikrobot, Windows Services, REST APIs

Additional client projects

- **Charles & Keith:** WMS customizations and backend automation services for ASN receiving, inventory enquiry, shipment confirmation and Hikrobot transfer workflows.
- **Soon Aik Global:** Warehouse automation modules and Crystal Reports for CTU transfer, cycle count, putaway and Hikrobot shelf operations.
- **Singapore MOE:** Android asset-management app with photo capture, Base64 image upload, SQLite storage and API integration.
- **Hai Sia Seafood:** Android point-of-sale app covering sales, checkout, receipt printing, receiving and transfer, with SQLite and Zebra Printer SDK integration.

EARLIER EXPERIENCE

Software Development Intern, **Irrahub Co. Ltd** Jul 2020 – Aug 2020 · Myanmar

Built an election information web platform with React.js and Node.js for candidate, voter-list and election-package search.

AWARDS

1st Prize, Myanmar National Cloud & AI Contest (2019)
Led the team that built a paddy pest detection mobile app using image classification and computer vision.

CERTIFICATES

- Intermediate SQL Server (Ginger Grant)
- Hierarchical and Recursive Queries in SQL Server (Jasmin Ludolf)
- Android Native Course (Fusion Lab Co. Ltd)

EDUCATION

University of Computer Studies (Taungoo)
Computer Science · 2015 – 2020 · Taungoo, Myanmar
Attended through the final year of the 5-year program.

LANGUAGES

Burmese (native) · English (conversational)
