Profile

.NET Developer with 3+ years of experience building C# / ASP.NET systems, MS SQL Server database logic, REST API integrations, and automation services for warehouse, robotics, and logistics platforms. Experienced in integrating WMS systems with PLCs, robotics platforms, Zebra/ZPL printing, and real-time operational dashboards for clients including Samsung SDS, Charles & Keith, Schneider Electric, and Singapore MOE.

Skills

Backend & Database: C#, ASP.NET, MS SQL Server, T-SQL, REST APIs, Windows Services

Integration: API Integration, Modbus TCP, Hikrobot, Libiao Robotics, HuarayTech MVSDK, Zebra/ZPL

Frontend / Mobile: Angular, JavaScript, Java Android, Kotlin, SQLite

Tools & Concepts: SSMS, Docker, Firebase, Git, Crystal Reports, Microservices Fundamentals

Professional Experience

Full Stack / Backend .NET Developer, Infolog Pte Ltd

10/2022 – Present

Develop backend-focused warehouse automation, robotics integration, WMS customization, and enterprise logistics systems for global clients and government agencies. Work includes C#/.NET services, REST API integrations, MS SQL Server workflows, reporting, and robotics system integration.

Selected Projects

Schneider Electric (Warehouse Automation)

2026

- Built real-time C# service communicating with PLCs via Modbus TCP to capture carton weights/barcodes and determine automated sorting lanes.
- Integrated HuarayTech MVSDK image capture with conveyor routing workflows using asynchronous database-driven triggers.
- Developed REST API integrations and SQL Server validation logic to synchronize order and packaging data for automated sorting operations.
- Built outbound logistics dashboards for exception handling, shipment tracing, and reject-lane issue resolution.

Samsung SDS Asia Pacific (3D Sorting Automation)

2025

- Implemented backend logic for 3D sorting and B2B/B2C packing workflows, supporting up to **890 orders daily** and **210 orders/hour**.
- Integrated Samsung Cello logistics platform with Libiao Robotics System for automated sorting operations.
- Built real-time dashboards for daily/weekly packing and sorting visibility.
- Supported UAT, go-live deployment, technical documentation, and project handover.

Makino Inc (Warehouse Automation)

- Developed forklift automation integration for receiving, pallet transfer, picking, and Zebra label printing workflows.
- Implemented REST APIs for order processing from creation to delivery status updates.
- Built MS SQL Server workflows, Crystal Reports, and dashboards for warehouse performance monitoring.

2025

Storefriendly Self Storage (Robotics Integration)

- Developed robotic storage management system handling **200+ automated storage shelves** across **4 customer terminals**.
- Integrated Hikrobot workflows for concurrent shelf retrieval, return, task queue management, and shelf assignment.
- Built automated door-control Windows service synchronized with robot arrival and departure events.

2024

- Additional Experience & Projects**
 - **Charles & Keith:** Developed WMS customizations and backend automation services for ASN receiving, inventory enquiry, shipment confirmation, and Hikrobot transfer workflows.
 - **Soon Aik Global:** Built warehouse automation modules and Crystal Reports for CTU transfer, cycle count, putaway, and Hikrobot shelf operations.
 - **Singapore MOE:** Delivered Android asset management app with photo capture, Base64 image upload, SQLite storage, and API integration.
 - **Hai Sia Seafood:** Built Android POS app with sales, checkout, receipt printing, receiving, transfer, SQLite, and Zebra Printer SDK integration.
 - **Irrahub Co. Ltd Internship:** Developed election information web platform using React.js and Node.js for candidate, voter list, and election package search.

Awards

1st Prize - Myanmar National Cloud & AI Contest (2019)

Led team that built a paddy pest detection mobile app using image classification and computer vision.

Education

University of Computer Studies (Taungoo)

Computer Science coursework; attended through final year

12/2015 – 2020
Taungoo, Myanmar

Certificates

Intermediate SQL Server; Hierarchical and Recursive Queries in SQL Server; Android Native Course

Languages

- Burmese native, English conversational
